#### OPPORTUNITY TO SPONSOR

AESC 2010 will be held in Canberra.  
Canberra is not only the nation's capital and  
heart of policy development, but it is also home  
of two of Australia's premier geoscience organi-  
sations Geoscience Australia and the Australian  
National University's Research School of Earth  
Sciences (birthplace of the famous SHRIMP  
mass spectrometer that has revolutionised Earth  
Science research over the past two decades).

This is a great opportunity to be recognised  
among an outstanding group of national and  
international speakers, industry leaders and  
key decision makers.

#### EARTH SYSTEMS: change, sustainability, vulnerability

##### Themes:

- Dynamic Earth: From Crust to Core
- Earth's Environments: Past, Present and Future
- Life and the Solar System
- Geoscience in the Service of Society
- Resource Security: Supporting our nation
- Topical

#### WHY INVEST IN AESC 2010?

If your target audience includes geologists,  
geophysicists, geochemists, hydrogeologists,  
environmental, geotechnical and engineering  
geologists, palaeontologists or indeed any earth  
science discipline, then AESC 2010 provides  
the perfect opportunity to stand out among  
service companies offering new generation  
technological solutions and to recruit young  
professionals, some of whom may still be  
undergraduate Earth Scientists.

#### THE CONVENTION

AESC 2010 will feature four days of technical  
presentations including keynote addresses,  
specialised industry forums, and workshops,  
all presented by industry and scientific leaders.  
There will be an exhibition area for the social  
events and networking opportunities, morning  
and afternoon tea, lunch and poster displays.

The meeting of so many colleagues  
in Canberra from overseas and interstate  
provides opportunities for your organisation  
to develop additional contacts and reinforce  
your position within the industry.

#### WHO WILL ATTEND?

Earth Science research is fundamental  
to providing responsible sustainable develop-  
ment solutions in a world with environmental  
problems. AESC is the premier Earth Science  
convention for 2010. Earth systems: change,  
sustainability, vulnerability are the issues for  
the 21<sup>st</sup> century and AESC 2010 is the conven-  
tion exploring solutions for those issues through  
new research, the meeting of scientists  
and work-shopping new approaches.
